17 (a) FINDINGS.—Congress finds that—

18 (1) the national security nuclear enterprise,
 19 which supports the nuclear weapons stockpile stew-
 20 ardship and reactors functions of the National Nu-
 21 clear Security Administration, requires a domestic
 22 fuel cycle, including uranium mining, uranium proc-
 23 essing, uranium enrichment, and fuel fabrication, ca-
 24 pable of producing low- and high-enriched uranium;

1 (2) many domestic advanced nuclear power in-
2 dustry participants require access to high-assay, low-
3 enriched uranium fuel for—

4 (A) initial fuel testing;

5 (B) operation of demonstration reactors;

6 and

7 (C) commercial operation of advanced nu-
8 clear reactors;

9 (3) as of the date of enactment of this Act, no
10 domestic uranium enrichment or fuel fabrication ca-
11 pability exists for uranium fuel enriched to greater
12 than 10 weight percent of the uranium-235 isotope;

13 (4) a healthy commercial nuclear fuel cycle ca-
14 pable of providing higher levels of enriched uranium
15 would benefit—

16 (A) the relevant national security functions
17 of the National Nuclear Security Administra-
18 tion; and

19 (B) the domestic advanced nuclear indus-
20 try of the United States; and

21 (5) making limited quantities of high-assay,
22 low-enriched uranium available from Department
23 stockpiles of uranium would allow for initial fuel
24 testing and demonstration of advanced nuclear reac-
25 tor concepts, accelerating—

1 (A) the path to market of those concepts;

2 and

3 (B) the development of—

4 (i) a market for advanced nuclear re-
5 actors; and

6 (ii) a resulting growing commercial
7 nuclear fuel cycle capability.

9 end-user after removing radioactive contami-
10 nants or other contaminants that resulted from
11 a previous use or fabrication of the fuel for re-
12 search, development, demonstration, or deploy-
13 ment activities of the Department (including ac-

11 “(a) IDENTIFICATION OF DYNAMIC CREDITING
12 METHODOLOGIES.—Not later than 2 years after the date
13 of enactment of this section, the Secretary, in consultation
14 with the Administrator of the Environmental Protection
15 Agency, shall identify methodologies for calculating the
16 carbon dioxide emissions from electricity generating re-
17 sources that are avoided or displaced by increasing the
18 generation from generating facilities eligible to receive
19 clean electricity credits under section 611(d). In carrying
20 out this subsection, the Secretary shall—

21 “(1) identify methodologies that estimate in an
22 accurate manner the net carbon dioxide emissions
23 avoided or displaced due to the electricity generated
24 by each specific generating facility in each genera-
25 tion dispatch interval; and

1 “(2) identify such a methodology or methodolo-
2 gies, as appropriate for generation resources located
3 within the region served by a regional transmission
4 organization or independent system operator, as de-
5 fined in section 3 of the Federal Power Act (16
6 U.S.C. 796), and for generation resources operating

23 retary on the technical conference and any Commis-
24 sion recommendations or evaluation concerning dy-
25 namic crediting methodologies.

1 “(c) DETERMINATION.—No later than 180 days fol-
2 lowing receipt of the report provided pursuant to sub-
3 section (b)(3), the Secretary, in consultation with the Ad-
4 ministrator of the Environmental Protection Agency, shall
5 approve use of one or more identified dynamic crediting
6 methodologies to issue clean electricity credits if the Sec-
7 retary determines that such use would—

8 “(1) significantly enhance confidence that a
9 clean electricity standard would achieve the carbon
10 dioxide emission reduction targets set forth in sec-
11 tion 611(a)(2); or

12 “(2) significantly reduce the costs of achieving
13 such targets.

14 “(d) USE OF DYNAMIC CREDITING METHODOLO-
15 GIES.—If the Secretary approves one or more identified
16 dynamic crediting methodologies under subsection (c), the
17 Secretary shall implement the approved methodology to

20 ology provided in 611(d)(2). The Secretary shall apply a
21 dynamic crediting factor approved under subsection (c) for
22 the first full calendar year after such approval, or for the
23 first year of the first compliance period, whichever is later,
24 except that the Secretary may delay use of approved dy-
25 namic crediting methodologies by one year if the Secretary

1 finds that additional time is needed for the Secretary or
 2 the Commission to take actions necessary for implementa-
 3 tion under subsection (e).

4 “(e) IMPLEMENTATION.—

5 “(1) The Secretary may, by rule, require that
 6 the regional transmission organizations, independent
 7 system operators, other balancing authorities, and
 8 other appropriate entities provide the Secretary with
 9 the information necessary for the Secretary to apply
 10 any approved dynamic crediting methodology.

11 “(2) At the request of the Secretary, or upon
 12 its own initiative, the Commission shall consider
 13 whether changes to tariffs on file under section 205
 14 of the Federal Power Act (16 U.S.C. 824d) are nec-
 15 essary to implement the requirements of any rule
 16 promulgated by the Secretary under paragraph
 17 (1).”.

 23 more regional electricity planning models and standard-
 24 ized sets of data, including potential renewable energy
 25 hourly production profiles at all potential locations for re-

1 newable energy deployment, that States can use to develop
2 plans for portfolios of clean electricity resources that are
3 capable of achieving the emission reduction trajectory pro-
4 vided in the clean electricity requirements established
5 under section 611 of the Public Utility Regulatory Policies
6 Act of 1978 at least cost and consistent with the need
7 to maintain reliability.

15 conference on planning models and standardized
16 data sets, including hourly profiles of renewable en-
17 ergy production at potential deployment locations,
18 and consider the input from such conference in
19 choosing planning models and data sets to make
20 available; and

21 (3) update the planning models and data sets
22 made available from time to time in response to new
23 information.

1 (c) USE OF MODELS BY STATES.—The Secretary
2 shall encourage States to use the models and data sets
3 to—

4 (1) plan collaboratively with other States in the
5 same North American Electric Reliability Corpora-
6 tion reliability region or organized electricity market
7 on least-cost and reliable compliance with the clean
8 electricity standard established under section 611 of
9 the Public Utility Regulatory Policies Act of 1978;
10 and

11 (2) adopt, and from time to time update, multi-
12 State clean electricity resource deployment goals
13 that promote least-cost deployment consistent with
14 maintaining electric reliability.

19 thereafter, the Secretary, in consultation with the Admin-
20 istrator of the Environmental Protection Agency, shall
21 publish a determination of the annual average level of
22 greenhouse gas emissions from the electric power sector
23 for the prior three calendar years.

24 (b) ENFORCEABILITY.—Emission limitations for car-
25 bon dioxide emissions from fossil fuel-fired power plants

1 established under title I of the of the Clean Air Act (42
2 U.S.C. 7401 et seq.) may be enforced by a State or by
3 the Administrator of the Environmental Protection Agen-
4 cy—

5 (1) before the clean electricity standard pro-
6 gram trigger date, only if—

7 (A) the Secretary, not earlier than 5 years
8 after the date of enactment of this Act, deter-
9 mines under subsection (a) that the 5-year an-
10 nual average level of electric power sector
11 greenhouse gas emissions exceeded the annual
12 average level of such emissions for the pre-
13 ceding 5-year period by at least 6 percent; or

14 (B) the Secretary finds that significantly
15 less than the full amount of funding authorized
16 for programs under this Act has been appro-
17 priated, resulting in substantial limitation to or
18 delay of the technology advancement program
19 elements of this Act; or

20 (2) after the end of a clean electricity standard
21 compliance period, if the clean electricity require-
22 ment is not enforced for the compliance period.

23 (c) CLEAN AIR ACT AUTHORITIES.—Except as pro-
24 vided in this section, neither a State nor the Administrator
25 of the Environmental Protection Agency may enforce any

1 emission limitation for carbon dioxide emissions from fos-
2 sil fuel-fired electric power generating units established
3 under title I of the of the Clean Air Act (42 U.S.C. 7401
4 et seq.).

5 (d) DEFINITIONS.—In this section:
